·	-
a) with, at	
b) on, in	
c) on, at d) to, at	
	.m. 0#0
2) Despite a string of poor performances, the chances of K.L.Rahul's selection in the teator (MA)	2020)
a) slim	. 2020)
b) bright	
c) obvious	
d) uncertain	
3) Select the world that fits the analogy:	
Cover: Uncover:: Associate: (MA	2020)
a) Unassiociate	
b) Inassiociate	
c) Misassociate	
d) Dissociate	
4) Hit by floods, the kharif (summer sown) crops in various parts of the country have been at Officials believe that the loss in production of the kharif crops can be recovered in the outher abi (winter sown) crops so that the country can achieve its food-grain production target million tons in the crop year 2019-20 (July-June). They are hopeful that good rains in July-will help the soil retain moisture for a longer period, helping winter sown crops such as who pulses during the November-February period.	tput of of 291 August
Which of the following statments can be inferred from the given passage (MA	2020)
 a) Officials declared that the food-grain production target will be met due to good grains b) Officials declared that the food-grain production target to be met by the November-February c) Officials declared that the food-grain production target cannot be met due floods. d) Officials declared that the food-grain production target will be met due to good rabi production 	
5) The difference between the sum of the first $2n$ natural numbers and the sum of the first n odd	
	2020)
a) $n^2 - n$	
b) n^2n	
c) $2n^2 - n$	
d) $2n^2 + n$	
6) Repo rate is the rate at which Reserve Bank of India (RBI) lends commercial banks, and repo rate is the rate at which RBI borrows money from commercial banks. (MA Which of the following statement can be inferred from the above passage?	reverse 2020)

a) Decrease in repo rate will increase cost of borrowing and decrease lending by commercial banks.

- b) Increase in repo rate will decrease cost of borrowing and increase lending by commercial banks.
- c) Increase in repo rate will decrease cost of borrowing and decrease lending by commercial banks.
- d) Decrease in repo rate will decrease cost of borrowing and increase lending by commercial banks.
- 7) P,Q,R,S,T,U,V and W are seated around a circular table. (MA 2020)
 - a) S is seated opposite to W.
 - b) U is seated in the second place to the right of R.
 - c) T is seated at the third place to the left of R.
 - d) V is neighbour of S.
 - a) P is neighbour of R
 - b) Q is neighbour of R
 - c) P is not seated at the third place to the left of R
 - d) R is the left neighbour of S
- 8) The distance between Delhi and Agra is 233 km. A car *P* started travelling from Delhi to Agra and another car *Q* started from Agra to Delhi along the same road 1 hour after the car *P* started. The two cars crossed each other 75 minutes after the car *Q* started. Both cars were travelling at constant speed. The speed of car *P* was 10km/hr more than the speed of car *Q*. How many kilometers the car *Q* had travelled when the cars crossed each other? (MA 2020)
 - a) 66.6
 - b) 75.2
 - c) 88.2
 - d) 116.5
- 9) For a matrix $M = [m_{ij}]$; i,j = 1, 2, 3, 4, the diagonal elements are all zero ans $m_{ij} = -m_{ji}$. The minimum number of elements required to fully specify the matrix is ______. (MA 2020)
 - a) 0
 - b) 6
 - c) 12
 - d) 16
- 10) The profit shares of two companies P and Q are shown in the figure. If the two companies have invested a fixed and equal amount every year, then the ratio of the total revenue of company P to the total revenue of company Q, during 2013 2018 ______. (MA 2020)

- a) 15:17
- b) 16:17
- c) 17:15
- d) 17:16
- 11) Suppose that T_1 and T_2 are topologies on X include by metrics d_1 and d_2 , respectively, such that $T_1 \subseteq T_2$. Then which of the following statments is TRUE? (MA 2020)
 - a) If a sequence sonverges in (X, d_2) then it converges in (X, d_1)
 - b) If a sequence sonverges in (X, d_1) then it converges in (X, d_2)
 - c) Every open ball in (X, d_1) is an open ball in (X, d_2)
 - d) The map $x \to x$ from (X, d_1) to (X, d_2) is continuous
- 12) Let $D = [-1, 1] \times [-1, 1]$. if the function $f: D \to \mathbb{R}$ is defined by

$$f(x) = \begin{cases} \frac{x^2 - y^2}{(x^2 + y^2)^2}, & (x, y) \neq (0, 0) \\ 0, & (x, y) = (0, 0) \end{cases}$$
 then (MA 2020)

- a) f is continuous at (0,0)
- b) both the first order pertial derivatives of exist at (0,0)
- c) $\int \int_D |f(x,y)|^{\frac{1}{2}} dxdy$ is finite
- d) $\int \int_{D} |f(x,y)| dxdy$ is finite
- 13) The initial value problem

(MA 2020)

$$y' = y^{\frac{3}{5}}, \quad y(0) = b$$
 (1)

has

- a) a unique solution if b = 0
- b) no solution if b = 1
- c) infinitely many solutions if b = 2

d) a unique solution if b = 1
